

## “Norfolk Broads River Authority 24 Hour Moorings”

The table below lists Norfolk Broads Authority 24 hour moorings and electric points. The moorings are listed in order from North to South. The vast majority of Broads Authority moorings are free but normally chargeable at Yacht Stations where facilities may be provided.

As boats vary greatly in size the number of moorings at each location is only an estimate and is based on an average space of 36 ft for each boat. Where double mooring is allowed the higher figure is based on all boats being double moored.

Subject to availability there are free moorings at hire boatyards. In addition there are moorings at staithes, privately owned or council moorings, pubs, restaurants and hotels. Several of these moorings may be chargeable. Some of these additional moorings can be found on “The Facilities Page” and pubs on “The Pub Map page”

Some of the additional moorings have electric points but these non B.A moorings may not use the electric card system. B.A Shore power electric card retailers are listed at the bottom of the website page.

Mooring at hire craft boatyards Is free but moorings are normally restricted to their own craft on main boat take over/return days typically but not restricted to Fridays, Saturdays and Mondays. Some boatyards may not allow overnight mooring the day before take over/return days so it’s best to check with the boatyard first. A list that includes Hire Boatyards with associated telephone numbers can be found on the “facilities page” .

Some moorings at pubs, hotels and restaurants are free to customers but others charge mooring fees sometimes partly or fully refundable when purchasing food.

On river banks I would only moor where there are signs permitting or as a customer outside a pub/businesses. Just because there may be no sign prohibiting mooring does not give you automatic right to moor there.

### Yacht Stations

- Yarmouth Yacht Station - Staffed every day during the season 8.00am - 8.00pm from the Saturday before Easter until the first week in November. Unattended and no mooring is allowed outside this period.  
Y.S Tel: 01493 842794. Some boatyards may also restrict travel toward and through Yarmouth out of season. If this could be an issue it may be best to check with the boatyard before booking.  
Opposite Yarmouth Yacht Station at Everitt Marine Services there are two overnight moorings available all year round. The Moorings are based based at Crusader Boatyard and have non BA electric points.  
Contact Tel: 07943 700865
- Norwich Yacht Station - Staffed 8.00am - 8.00pm from the Saturday before Easter until the first week of November. Tel: 01603 612980.
- Reedham Quay – Staffed 8.00am - 8.00pm from the Saturday before Easter until the first week of November. Although unstaffed from November to Easter, mooring is allowed all year round but you will find the water hoses removed. They do sometimes leave one hose operational by the main hut. Mooring is free all year round.
- Beccles and Oulton Broad Yacht station – Moorings are available all year round and are staffed all day from 08:00 in season but only part day November to Easter.  
They are not B.A but run by Sentinel Leisure Trust. Moorings and can be booked by contacting the relevant Harbour Master. Beccles: 01502 712225 and Oulton Broad: 01502 574946 or both via VHF Channel 73.

The Broads Authority are promoting double mooring in some locations which are listed in the chart under mooring description as (DMA). Hopefully this will only be necessary at very busy times. You need to gain agreement from those on board the other boat before mooring alongside. Only moor alongside a boat that is at least as large as yours. I would personally only double moor as a last resort and would go out of my way to moor next to another hire boat.

It is worth noting that the next moorings cruising north from Great Yarmouth is near the Stracey Arms wind pump and is approximately 9 miles away. It is not a Broads Authority mooring area, but a very large mooring area running along the back of which long ago was The Stracey Arms pub. A mooring fee is payable.

## Northern Broads

**Running engines.** On occasions there may be a need to run the engine to put a bit of charge in the batteries or heat water etc. Etiquette suggests we endeavour not to run boat engines whilst moored up where other boats may be close enough to cause them a nuisance.

Should it deem necessary to run the engine the general consensus makes it more acceptable between the hours of 08:00 and 20:00. Should you need to run the engine for a prolonged period or outside of these hours it would be polite to let your neighbours know the reason. I would also only run the engine at no more than a fast tick over

Avoid running your engine if double moored or in a busy marina especially if moored stern on next to another boat. Causing smoke fumes or noise can be an offence and could incur a hefty fine for the master or hirer of a vessel.

You may need to start the engine and leave the moorings early in the morning, perhaps to reach Yarmouth for slack water, aim for some other destination due to water levels at bridges or maybe the return of the boat at the end of your holiday. I normally first untie and retie the ropes to ensure they can be easily released and raise the mud weight if applicable. I then start the engine, check that gauges display as they should and check water is being pumped out of the exhaust. Once the engine ticks over smoothly we are untied and on our way. This normally takes no more than 2 or 3 minutes of running the engine before departure.

**Fishing and moorings.** Broads Authority 24 hour moorings are primarily for the mooring of boats and take priority over people fishing. I would personally not recommend fishing from the bank of pub moorings as I am sure the owners would want their moorings to be available for customers. You can always fish from onboard the boat and just reel in whilst a boat is coming in to moor near you.
